

Pegasus Astronomical Society

**Regular Meeting
Wednesday, October 6, 2010
7:00 pm - 8:00 pm**

Math & Computer Science Bldg., Rm 109

At this meeting the Society will have an astronomical activity arranged by co-sponsor Prof. Chad Ellington. Additionally, we will discuss a possible trip for club members and their guests to Liberty Lake north of Edmond on the night of Friday, Oct. 8 or Saturday, Oct. 9 to take advantage of the dark skies there to look at objects too faint to view in Edmond. Also, we may discuss a field trip, possibly in November, to the Selman Living Lab where UCO maintains a small astronomical facility.

Light refreshments and soft drinks will be available at this meeting.
